## **DETAILED ACTION**

### ***Claims and Claim Objections***

Claims 25-28 are canceled by Applicant. Claims 1-6, 22, and 23 are amended. Claims 29-33 are added. Claim 29 is amended. Objections to claims are withdrawn.

### ***Allowable Subject Matter***

Claims 1-6, 21-24, and 29-33 are allowed.

The following is an examiner's statement of reasons for allowance:

As to independent claims 1, 4, and 29, a thorough search of relevant prior art of record did not disclose, alone or in combination, the light guiding structure as claimed comprising a plurality of solid block-shaped transparent element structures disposed within the plurality of notches, wherein a refractive index of the plurality of transparent element structures is different from that of the light guide plate, and wherein the plurality of transparent element structures includes at least one surface that is outside of the plurality of notches and outside of the light guide plate structure.

The closest combination of prior art is Sasagawa et al (Sesagawa) USPAT 6,454,452 in view of Pelka et al (Pelka) USPAT 6,647,199 B1.

Sasagawa discloses a light guide plate structure [back light device, entire patent, e.g., Figures 1-2B] comprising:

a light guide plate, comprising at least one light incident surface, a light scattering surface, 24, and a light emitting surface, top, wherein the light incident surface, 20, is on a sidewall of the light guide plate, the light scattering surface is on a bottom surface of the light guide plate, the light emitting surface is on a top surface of the light guide plate, wherein the light scattering surface has a plurality of notches; and a plurality of transparent element structures [air, scope of "element structures" is equivalent to "elements" per Applicant's response of 30 October 2006], disposed within the plurality of notches, wherein a reflective index of the plurality of transparent element structures is different from that of the light guide plate. Please note that the term structure can reasonably be considered to mean configuration, form, shape, etc. Furthermore, air is a substance that has an index of refraction. The structures would perform differently if the assembly were immersed in an alternate gas or gas mix having a different index of refraction or color. The mere fact that these structures are made of air structured by the boundaries of the notches does not diminish their significance.

FIG. 1

FIG. 2A

FIG. 2B

Pelka teaches that use of acrylic is known to be a preferred material for use in the making of light guide plates [col. 6, lines 26-36] and Pelka teaches that transparent

Art Unit: 2871

scattering element structures can be made of any transparent material that has an index of refraction different from that of the light guide [col. 9, lines 28-32]. Pelka also teaches that such structures can be concave, convex, smooth, or rough to increase optical diffusion [col. 15, lines 62-67]. Please note that this would result in Applicant's newly added limitations of having first and second surfaces so that the first surfaces are within the plurality of notches and the second surfaces are outside the plurality of notches [convex or protruding].

However, no prior art with proper motivation to combine was found to teach the claimed limitations of a plurality of solid block-shaped transparent element structures disposed within the plurality of notches, wherein a refractive index of the plurality of transparent element structures is different from that of the light guide plate, and wherein the plurality of transparent element structures includes at least one surface that is outside of the plurality of notches and outside of the light guide plate structure.

As to dependent claims, they are directly or indirectly dependent upon a claim with allowable subject matter above.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
